

CABLE REELS

Winkle supplies general purpose and mill-duty cable reels for industrial applications. Our electric cable reels are primarily used on mobile machinery to provide a flexible power source to many pieces of electrical equipment. Horizontal and vertical mounted cable reels are available in a wide variety of reel diameters with various conductor ranges and slip ring parameters.

Standard Features:

- Heavy-duty mechanical constructions
- Designs for ease of installation and maintenance
- Heavy-duty copper slip rings
- Nema 4 electrical enclosures

Typical Applications Include:

- Overhead cranes
- Conveyers
- Equipment carriers
- Material handling applications
- Tool transporters
- Jib booms
- Turn tables
- Hose winders
- Balancers
- Cable winders
- Task-saver systems
- Static discharge grounding reels
- Marine service

Optional Features:

- Down roller guides
- Spool locks
- Outdoor applications
- Pivot or swivel bases
- Guide rails
- Models for 2 to 36 conductors
- Collector assemblies rated from 30 to 200 amps
- Cables from 20' to 350'
- Compact low profile constructions
- Wide range of operating temperatures
- Numerous frame sizes available
