REMAN SERVICES

PLAN AHEAD AND REDUCE DOWN TIME

Winkle continues to exceed customers' expectations through our diversified product and service capabilities; providing sound engineered material handling solutions.

BUY WITH CERTAINTY

Convert your damaged and out-of-service lifting magnets into safe, reliable, and useful tools. Our in-house Reman services take the guesswork out of magnet rebuilds and you replace only what's needed to restore the service life of your lifting magnets.

Quality standards and workmanship are validated utilizing a full series of mechanical, electrical, and operational tests to confirm and ensure mechanical and electrical integrity. Theoretical lifting capabilities are measured under various conditions and rebuilds are automatically cycle tested at rated duty cycles on our magnet test analyzer to assure maximum performance and workplace safety.

Backed by an ISO quality discipline and like-new guarantees, the Reman repair and remanufacturing capabilities ensure magnet rebuilds meet or exceed original manufacturer's specifications.
