

# ReMan<sup>®</sup>

**BEFORE**

**AFTER**

**Expert Repair and  
Remanufacturing Services  
for Magnetic Lifting Devices**

***Reclaim the value and  
performance of any make  
or model of lifting magnet  
with Winkle's complete  
ReMan<sup>®</sup> services***

**ReMan<sup>®</sup> provides support through:**

- Multi-Point Inspections
- Failure Analysis Studies
- Upgrade Recommendations
- Detailed Quotations
- Historical Data Tracking

# ReMan®

## Excellence in Repair and Remanufacturing

Providing sound engineered material handling solutions is at the heart of Winkle's success, guiding us to new product development, quality processes and service insight.

### Choose with Confidence

With over 60 years of magnetic lifting device experience, Winkle's teams of professional engineers, journeyman machinists, certified welders, qualified technicians and trained inspectors combine expertise to repair and remanufacture all makes and models of lifting magnets.

When you utilize Winkle's state-of-the-art ISO certified facility, leading-edge technology and our highly experienced personnel, you are connected to quality processes, service insight and true end-to-end support.

Accessing Winkle for magnet rebuilds connects you to experts who will evaluate your present application and possible future needs to determine optimum magnet requirements to maximize your operation's productivity.

From minor to major rebuilds, customers count on Winkle for trustworthy communication, sound support and timely responses to repair and remanufacture lifting magnets to like-new or better condition for less than the cost of new.

### Buy with Certainty

Convert your damaged and out-of-service lifting magnets into safe, reliable and useful tools. Our in-house **ReMan®** services take the guesswork out of magnet rebuilds and let you replace only what's needed to restore the service life of your lifting magnets.

Our comprehensive inspection and analysis procedures, accompanied by detailed reporting processes, guarantee customers see exactly what their failed device requires. Winkle's **ReMan®** services don't just incorporate a price to rebuild, they also provide details on the probable cause for failure and can incorporate recommendations on how to extend magnet service life.

Quality standards and workmanship are validated utilizing a full series of mechanical, electrical and operational tests to confirm and ensure mechanical and electrical integrity. Theoretical lifting capabilities are measured under various conditions, and rebuilds are automatically cycle tested at rated duty cycles on our magnet test analyzer to assure maximum performance and workplace safety.

Backed by an ISO quality discipline and like new guarantees, the **ReMan®** repair and remanufacturing capabilities ensure magnet rebuilds meet or exceed original manufacturer's specifications.

### Plan Ahead and Reduce Downtime

For full-life cycle support, tap into Winkle's **LiftSafe®** and **LiftTrax®** magnet programs for sound operational, maintenance and management procedures.

**LiftSafe®** and **LiftTrax®** provide:

- Equipment Identification & Classification
- Documented Procedures
- Operational & Maintenance Training
- Testing & Inspection Services
- Correction of Deficiencies
- Quality Assurance
- Historical Tracking & Measuring

Winkle continues to exceed customers' expectations through our diversified product and service capabilities; providing sound engineered material handling solutions.
